

STRATEGIC AI ADVISORY

AI ADVISOR

YOUR PERSONAL AI COMPANION

Most companies have started using AI, but very few are using it strategically.

Tools like Microsoft Copilot, ChatGPT and agents are already being used in day-to-day work across the organization, but without a clear strategy, governance or direction, they rarely create real business impact.

No shared AI strategy

Shadow AI & security risks

Low adoption across teams

No measurable ROI

THE SOLUTION

WHAT IS THE AI ADVISOR?

A continuous advisory service for companies that want to use artificial intelligence strategically, securely, and effectively. We guide you toward a sustainable AI strategy and help you become a **Frontier Company**, where AI is deeply embedded in your organization's DNA.

YOUR BENEFITS

WHAT YOU ACHIEVE WITH THE AI ADVISOR

Company-wide AI strategy

A sustainable AI strategy aligned across business, IT, and leadership.

Strategic AI roadmap

Clear identification and prioritization of use cases, including KPI definition and execution planning.

AI team enablement

Build and empower an internal AI team to independently drive your AI transition.

Governance & Security

Governance frameworks, shadow AI control, access models, risk management, licensing and cost control.

Copilot & Agents

Identification of high-value use cases, pilot projects, and structured rollout of Microsoft Copilot and AI agents.

Adoption

Trainings, champions programs, and adoption strategies to ensure sustainable usage.

Performance Tracking

Regular reviews, ROI tracking, and continuous strategy optimization.

Sparring

Direct access to an experienced AI Advisor for strategic and operational guidance.
