

# MICROSOFT SECURITY

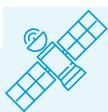

## CLOUD SECURITY ENVISIONING WORKSHOP

### Start your stellar path with Microsoft Defender for Cloud

The Cloud Security Envisioning Workshop helps you evaluate and strengthen security across your cloud workloads using Microsoft Defender for Cloud.

Join if you are:

- Deploying Microsoft Defender for Cloud for the first time
- Expanding Defender for Cloud across subscriptions, workloads, or clouds
- Improving threat detection, posture management, or compliance readiness
- Reducing risk in hybrid and multi cloud environments without a long audit style assessment

#### SCOPE

Explore threat detection, security posture, and risks and opportunities across your cloud environments with **Microsoft Defender for Cloud**

#### DEPLOYMENT

A focused workshop delivered in your production environment:

- Using your organization's real telemetry and data
- Designed to build intent and momentum for deploying or expanding Defender for Cloud
- Structured exploration and discussion to turn findings into a clear plan forward
- Concludes with actionable next steps aligned to your goals

#### YOUR WORKSHOP WINS

- Clear view of your cloud security posture
- Real risks and vulnerabilities surfaced from your own data
- Practical clarity on how Defender for Cloud supports your strategy
- Roadmap and next steps to align stakeholders and move forward
