

MICROSOFT SECURITY

SECURITY WORKSHOPS

Strengthen your defenses before threats strike

From advanced threat protection to data compliance and enterprise visibility, gain the skills and insights needed to stay ahead of evolving cyber risks. Strengthen your security posture with these expert-led Microsoft workshops:

THREAT PROTECTION

Expose real threats in your production environment

Scope

Identify vulnerabilities in your **production environment** and strengthen defenses with **Microsoft Defender XDR** and **Sentinel**.

Deployment

Mandatory Modules

- Microsoft Defender Portal (Defender XDR)
- Cloud Identity Protection (Entra ID Protection, Entra Conditional Access)

Selectable Modules (Choose at least 3)

- Unified SecOps Platform (Microsoft Sentinel)
- Email Protection (Microsoft Defender for Office 365)
- Endpoint & Cloud App Protection (Microsoft Defender for Endpoint, Vulnerability Management, Cloud Apps)
- Microsoft Copilot for Security (Demo Version)

Your Workshop Wins

- A clear view of current security gaps and priorities
- Detect real threats and vulnerabilities
- Explore tailored Microsoft solutions
- Strengthen defenses with expert guidance

MODERN SECOPS

Gain full security visibility with Sentinel & SecOps

Scope

Uncover hidden threats and build a clear strategy to modernize security operations with **Sentinel & SecOps**.

Deployment

Customize the engagement to meet your specific security operations needs:

Threat Exploration

- Integrate Microsoft Sentinel in your existing security operations center (SOC) augmenting an existing SIEM—our team will work with your SecOps team and provide additional readiness to bring them up to speed.

Remote Monitoring (optional)

- Offload monitoring tasks to Experts Inside team that will perform remote monitoring and threat hunting for you.

Your Workshop Wins

- Unified visibility across email, identity, endpoints, and beyond
- Boost detection and response with Sentinel and Unified SecOps
- Learn to prioritize and mitigate attack vectors effectively
- Define a clear deployment roadmap for your environment

DATA SECURITY

Protect sensitive data with Microsoft Purview

Scope

Get a clear view of data risks and protect sensitive information with **Microsoft Purview**.

Your Workshop Wins

- A clear view of current security gaps and priorities
- Detect real threats and vulnerabilities
- Explore Microsoft Purview capabilities to protect sensitive information
- Receive expert guidance every step of the way
