

MODERN WORKPLACE

SECURE PRODUCTIVITY

In this workshop, you'll see how to design and test a secure, modern workplace in your own tenant, configuring Intune Autopilot, deploying security policies, exploring Defender and Purview, and experiencing a live proof-of-concept with enrolled devices.

CONTENTS

STAGE 1: DESIGN & CONCEPT

- Work through Tenant requirements, licenses and POC environment
- Define Intune Autopilot Spec Sheet (Entra ID only)
- Get aligned with project Stake holders

STAGE 2: CONFIGURE INTUNE AUTOPILOT POC

- Configure & Deploy hardened XI Device Policies (CIS aligned)
- Configure Client Design following Spec Sheet Guidance
- Deploy some sample Packages (Office, PDF, ...)

STAGE 3: DEFENDER & PURVIEW

- Enroll and configure Defender for Endpoint for POC Devices
- Configure and showcase Defender Operations (Alerting, Hunting with KQL, Reporting)
- Configure & Deploy XI Purview Information Protection Labels

STAGE 4: POC! HANDS ON!

- Enroll some Devices
- Test onprem access for Fileservices, Apps, aso (SSO with Kerberos Cloud Trust)
- Work some time to get a feeling of the performance and reliability of the newSecure Productive Workplace
